

CERTIFICATE OF SMART CONTRACT AUDIT

This is to certify that Entersoft Australia Pty Ltd has successfully completed a rigorous Static and Dynamic Smart Contract Audit on the Rust-based smart contracts provided by AUDC Pty Ltd. The audit has verified that these contracts comply with leading industry standards, including the DASP Top 10, SWC Registry, NIST SP 800, OWASP, the Rust Secure Coding Guidelines, and Rust Smart Contract Security Best Practices. These findings confirm that the AUDC Pty Ltd Rust smart contracts meet the highest levels of security and compliance.

Entersoft Australia Pty Ltd acknowledges and commends AUDC Pty Ltd for their proactive and diligent approach to security. Following the identification of vulnerabilities, AUDC Pty Ltd promptly addressed and remediated all issues. This included but not limited to addressing vulnerabilities in critical attack vectors such as Access Control Policies, Transaction Signature Validations, Default Visibility, Outdated Compiler Version, Input Validation, Deprecated Rust Functions, Shadowing State Variables, Presence of Unused Variables, Overflow and Underflow Conditions, Assets Integrity, Errors and Exceptions, Re-initiation with Cross-instance Confusion, and Casting Truncation.

Furthermore, AUDC Pty Ltd has implemented ongoing security measures to ensure that any future code changes will be subject to thorough audit checks, underscoring their dedication to continuous improvement and security excellence.
